

In August of 2005, the European Union (EU) implemented the EU WEEE Directive 2002/96/EC and later the WEEE Recast Directive 2012/19/EU requiring Producers of electronic and electrical equipment (EEE) to manage the collection, reuse, recycling and to appropriately treat WEEE that the Producer places on the EU market after August 13, 2005. The goal of this directive is to minimize the volume of electrical and electronic waste disposal and to encourage re-use and recycling at the end of life.

Rhopoint Instruments/Hanatek Ltd has elected to join a WEEE Compliance Scheme to help manage customer returns at end-of-life. If you have purchased a Rhopoint Instruments/Hanatek Ltd branded electrical or electronic product in the EU and are intending to discard these products at the end of their useful life, please do not dispose of them with your other household or municipal waste. Rhopoint Instruments/Hanatek Ltd has labelled its branded electronic products with the WEEE symbol to alert our customers that products bearing this label should not be disposed of in a landfill or with municipal or household waste in the EU. Rhopoint Instruments will offer to take back (at an agreed cost to the customer) any old, un-serviceable or redundant instruments which fall into Annex 1B, Category 9. Rhopoint Instruments will then be responsible for the disposal of this equipment.

Please contact us on +44 (0) 1424 739622 and we will advise on the process for returning these waste products.

Signed on behalf of Rhopoint Instruments Limited.

Adam Stanger.

Group Quality Manager – Rhopoint Instruments Limited.
